NOTE: If you or someone close to you have recently travelled outside of Canada, please tell reception

Clinic entry poster v1-NM-03-20

@OntariosDoctors

With COVID-19 top of mind, We wanted to reach out directly to say that our clinic is ready to help you. We want to make sure our medical services are safe, convenient and accessible to our patients.

We also want to assure you that we've taken numerous precautions to keep our Clinics clean for our Patients, customers, staff and physicians. This has including deeper cleanings and alcoholbased sanitizers available at every location. Your wellbeing and the safety of our staff are top of our mind.

In late January, we implemented a patient screening program for all patients and have been doing this for all our walk in patients and our booked appointments. We continue to screen each patient that comes to our clinic.

Our staff have been asking a series or questions that help us to determine if a patient is at risk and if so, triage them appropriately, and refer them to the appropriate care centre.

We have also had our staff wear masks and where necessary, gloves and gowns to protect themselves, their co-workers and people around them.

We are following the local public health directives to ensure we keep everyone safe.

We will be implementing a Telemedicine system in the next few days so that you can still have contact with your doctor and the clinic.

If you have questions please call the local public health unit or one of the Covid-19 Testing Centres: North York General Hospital, Brampton Civic Hospital, Mackenzie Hospital.
